

Life Science Unit 1 Test Study Guide

Bring this study guide totally completed for 5 extra credit points added to your test score. All sections need to be completed. No credit will be awarded for incomplete work.

Word	Definition
Cell Biologist	
6 characteristics of living thing	
nonliving	
homeostasis	
cell	
cellular	
unicellular	
prokaryotic cell	
multicellular	
eukaryotic cell	
organelle	
mitochondria	
cell membrane	
nucleus	
nucleolus	
cytoplasm	

ribosome	
endoplasmic reticulum	
Golgi body	
vacuole	
chloroplast	
cell wall	
cellular organization/ hierarchy	
tissue	
organ	
organ system	
organism	
muscle tissue	
connective tissue	
nervous tissue	
epithelial tissue	
microscope	
Cell Theory	
virus	
host cell	

photosynthesis	
4 factors that affect photosynthesis	
cellular respiration	
adenosine triphosphate/ATP	
carbon dioxide	
glucose	
oxygen	
water
